

CRTLPyme Service Cleanup Complete

Summary

Successfully cleaned up the duplicate `crtlpyme-app` service and consolidated all deployments to the single `crtlpyme` service.

Completed Actions

1. Cloud Run Service Cleanup

-  **Deleted** `crtlpyme-app` service from GCP Cloud Run
-  **Verified** only `crtlpyme` service remains active
-  **Active Service URL:** <https://crtlpyme-399088129827.us-central1.run.app>

2. GitHub Actions Workflow Updated

File: `.github/workflows/deploy.yml`

-  Changed `SERVICE_NAME` from `crtlpyme-app` → `crtlpyme`
-  All future GitHub Actions deployments will target the correct service

3. Cloud Build Configuration Updated

File: `cloudbuild.yaml`

-  Changed service name from `crtlpyme-app` → `crtlpyme`
-  All future Cloud Build deployments will target the correct service

4. Application URLs Updated

Files Updated:

-  `app/terms/page.tsx` - Fixed Terms of Service URL
-  `app/privacy/page.tsx` - Fixed Privacy Policy URL
- **Old URL:** `~~https://crtlpyme-app-399088129827.us-central1.run.app~~`
- **New URL:** <https://crtlpyme-399088129827.us-central1.run.app>

5. Git Repository Updated

-  All changes committed to Git
 -  Changes pushed to GitHub repository
 -  **Commit:** "Remove duplicate `crtlpyme-app` service - consolidate to single `crtlpyme` service"
-

Changes Summary

File	Change	Status
<code>.github/workflows/deploy.yml</code>	SERVICE_NAME: <code>crtlpyme-app</code> → <code>crtlpyme</code>	✓
<code>cloudbuild.yaml</code>	deploy target: <code>crtlpyme-app</code> → <code>crtlpyme</code>	✓
<code>app/terms/page.tsx</code>	URL updated to correct service	✓
<code>app/privacy/page.tsx</code>	URL updated to correct service	✓

Next Steps

Immediate Verification

1. **Next deployment** will automatically use the `crtlpyme` service
2. No manual intervention required for future deployments
3. All CI/CD pipelines now point to the correct service

Testing Deployment

To trigger a deployment and verify:

```
# Option 1: Push any commit to main branch
git commit --allow-empty -m "Test deployment to crtlpyme service"
git push origin main

# Option 2: Trigger manual deployment from GitHub Actions
# Go to: https://github.com/kbzas090/CRTLPyme/actions
# Select "Deploy to Cloud Run" workflow
# Click "Run workflow"
```

Verify Deployment

After deployment completes, verify at:

- **Production URL:** <https://crtlpyme-399088129827.us-central1.run.app>
- **Cloud Run Console:** <https://console.cloud.google.com/run?project=crtlpyme-477300>

Verification Checklist

- [x] Duplicate service deleted from GCP
- [x] Only one Cloud Run service exists (`crtlpyme`)
- [x] GitHub Actions workflow updated

- [x] Cloud Build configuration updated
 - [x] Application URLs corrected
 - [x] Changes committed and pushed to GitHub
 - [x] No remaining references to `crtlpyme-app` in critical files
-

Notes

Documentation Files

The following documentation files still contain historical references to `crtlpyme-app`:

- `PLANS_IMPLEMENTATION_SUMMARY.md`
- `CICD_SETUP_GUIDE.md`
- `docs-academicos/Modelo_4+1_CRTLPyme.md`
- `docs-academicos/Componentes_Arquitectura_GCP.md`
- Various other documentation files

These are documentation/historical files and do NOT affect deployments.

If needed, these can be updated separately for consistency.

Configuration Verified

All critical deployment files have been updated:

- ☒ GitHub Actions workflows
 - ☒ Cloud Build configuration
 - ☒ Application source code (URLs)
 - ☒ No `.env` or environment-specific overrides found
-

Current State

Active Service: `crtlpyme`

- **Project ID:** `crtlpyme-477300`
- **Region:** `us-central1`
- **URL:** `https://crtlpyme-399088129827.us-central1.run.app`
- **Memory:** 2Gi
- **CPU:** 2
- **Max Instances:** 10
- **Min Instances:** 0

Deployment Methods:

1. ☒ GitHub Actions (on push to main)
 2. ☒ Manual workflow dispatch
 3. ☒ Cloud Build (if configured as trigger)
-

Success Criteria Met

- ☒ **Single Service:** Only `crtlpyme` exists in Cloud Run
- ☒ **Deployment Consistency:** All deployment configs updated

- ✓ **Code Consistency:** Application URLs corrected
 - ✓ **Version Control:** Changes committed and pushed
 - ✓ **Zero Downtime:** Main service remained active throughout
-

Cleanup Complete!

All future deployments will automatically target the correct `crtlpyme` service.
No further action required for this consolidation.
