

GCP Deployment Summary - CRTLPyme Project

Date: November 8, 2025
Project ID: crtlpyme-477300
GCP Account: crtlpyme@gmail.com

✔ Task Completion Status

1. Service Account JSON Key - COMPLETED

- Service Account Details:**
- **Email:** github-actions@crtlpyme-477300.iam.gserviceaccount.com
 - **Name:** GitHub Actions Service Account
 - **Description:** Service Account for GitHub Actions CI/CD
 - **Status:** Enabled (Habilitada)

- JSON Key File:**
- **Location:** /home/ubuntu/gcp-service-account.json
 - **File Name:** crtlpyme-477300-b26b110cecfa.json
 - **Size:** 2.4K
 - **Created:** November 8, 2025 at 14:30
 - **Key ID:** 4166d083dd2520cbf8175e9a732cdd8e5d5de238
 - **Expiration:** December 31, 9999

Verification:

```
{
  "type": "service_account",
  "project_id": "crtlpyme-477300",
  "client_email": "github-actions@crtlpyme-477300.iam.gserviceaccount.com"
}
```

2. Service Account Permissions - COMPLETED

The service account has been granted the following IAM roles:

- ✔ **Cloud Run Admin (Administrador de Cloud Run)**
 - **Purpose:** Full control over all Cloud Run resources
 - **Permissions:** Deploy, update, delete Cloud Run services
 - **Status:** Successfully assigned
- ✔ **Cloud SQL Client (Cliente de Cloud SQL)**
 - **Purpose:** Connectivity access to Cloud SQL instances
 - **Permissions:** Connect to Cloud SQL databases
 - **Status:** Successfully assigned

Note: Policy changes may take a few minutes to fully activate.

3. Existing Cloud Run Deployments - FOUND

Service 1: crtlpyme

- **Type:** Container deployment (Contenedor)
- **Region:** us-central1
- **URL:** <https://crtlpyme-399888129827.us-central1.run.app>
- **Authentication:** Allow without authentication (Permitir sin autenticación)
- **Ingress:** All (Todas)
- **Status:**  Healthy (Green checkmark)
- **Last Deployment:** 1 hour ago
- **Current Traffic:** 0 requests/sec

Service 2: crtlpyme-app

- **Type:** Source deployment (Fuente)
- **Region:** us-central1
- **URL:** <https://crtlpyme-app-399888129827.us-central1.run.app>
- **Authentication:** Allow without authentication (Permitir sin autenticación)
- **Ingress:** All (Todas)
- **Status:**  Healthy (Green checkmark)
- **Last Deployment:** 54 minutes ago
- **Current Traffic:** 0.01 requests/sec

Additional Service Accounts Found

The project has several other service accounts configured:

1. **github-actions-deploy-666@crtlpyme-477300.iam.gserviceaccount.com**
- Roles: Cloud Run Admin, Editor
2. **github-actions-deployer@crtlpyme-477300.iam.gserviceaccount.com**
- Roles: Storage Admin, Cloud Run Admin, Storage Object Admin, Artifact Registry Writer, Secret Manager Secret Accessor, Service Account User
3. **github-actions-deployer-606@crtlpyme-477300.iam.gserviceaccount.com**
- Name: github-actions-deployer
4. **Default Compute Service Account**
- Roles: Editor, Secret Manager Secret Accessor

Next Steps for Deployment

1. **Use the Service Account JSON:** The file at `/home/ubuntu/gcp-service-account.json` can now be used for:

- GitHub Actions secrets (GCP_SA_KEY)
- Local deployment testing
- CI/CD pipeline configuration

2. **Choose Deployment Target:** Two Cloud Run services exist:

- **crtlpyme**: Container-based deployment
- **crtlpyme-app**: Source-based deployment

Recommend using **crtlpyme-app** as it's more recent and shows active traffic.

1. **Verify Permissions:** The service account now has:

-  Cloud Run deployment capabilities
-  Cloud SQL connection access
-  May need additional roles for:
 - Artifact Registry (if using container images)
 - Secret Manager (if using secrets)
 - Storage (if using Cloud Storage)

2. **Test Deployment:** Use the service account to deploy to either existing service or create a new one.

Security Notes

- The JSON key file contains sensitive credentials
- Store securely and never commit to version control
- Consider rotating keys periodically
- The key has a very long expiration (9999), consider setting a shorter expiration for security

Support Information

GCP Console: <https://console.cloud.google.com/run?project=crtlpyme-477300>

Project Dashboard: <https://console.cloud.google.com/home/dashboard?project=crtlpyme-477300>

IAM & Admin: <https://console.cloud.google.com/iam-admin/iam?project=crtlpyme-477300>

Status:  All tasks completed successfully

Ready for Deployment: Yes

Presentation Ready: Yes - Application infrastructure is in place
