

CRTLPyme Database Verification Summary

Date: November 7, 2024
Status:  Database Successfully Populated

Executive Summary

The CRTLPyme database has been successfully verified and populated with comprehensive demo data. The database contains all necessary components for a fully functional MVP demonstration, including 14 businesses, 72 users across different roles, 542 products, and historical transaction data.

Database Statistics

Component	Count	Status
Subscription Plans	3	 Complete
Businesses (Tenants)	14	 Complete
Total Users	72	 Complete
Master Products	542	 Complete
Tenant Inventories	3,300	 Complete
Sales Transactions	728	 Complete
Stock Adjustments	136	 Complete
Active Subscriptions	39	 Complete
Subscription Payments	151	 Complete

Key Findings

Data Population Status

- **Master Products:** Successfully imported 542 products to the master catalog
- Initial import added 42 Chilean products from `productos_chilenos.json`
- Database already contained 500 products from previous seeding
- Products include Chilean brands like Coca-Cola, Lays, Kryzpo, McKay, etc.

✓ Multi-Tenant Structure

- **14 Chilean businesses** representing realistic PyME scenarios:
- 7 businesses on BASIC plan (50%)
- 5 businesses on PRO plan (36%)
- 2 businesses on ENTERPRISE plan (14%)

✓ User Accounts by Role

Role	Count	Description
PROVEEDOR (Super Admin)	1	Platform administrator with full access
ADMIN (Business Owner)	~14	One per business, full business management
CAJA (Cashier/Seller)	~35	Sales and POS operations
INVENTARIO (Inventory Manager)	~22	Stock management and adjustments

✓ Historical Data

- **728 sales transactions** across 3 months
- **136 stock adjustments** (purchases, losses, corrections, returns)
- **39 active subscriptions** with payment history
- **151 subscription payments** recorded

Quick Access Credentials

🔑 Standard Passwords

- **Platform Admin:** Admin2025!
- **All Other Users:** Demo2025!

👤 Platform Administrator

Email: admin@crtlpyme.com
 Password: Admin2025!
 Role: PROVEEDOR (Super Admin)
 Access: Full platform access, all businesses

👥 Sample Business Owner Accounts

Minimarket Don Luis (PRO Plan)

Email: admin@minimarketdonluis.cl
 Password: Demo2025!
 Role: ADMIN (Business Owner)
 Features: 5 users, unlimited products, Transbank integration

Supermercado Los Andes (ENTERPRISE Plan)

Email: admin@losandessupermarket.cl
 Password: Demo2025!
 Role: ADMIN (Business Owner)
 Features: Unlimited users, all premium features

Almacén El Rinconcito (BASIC Plan)

Email: admin@gmail.com
 Password: Demo2025!
 Role: ADMIN (Business Owner)
 Features: 2 users, up to 500 products, basic reports

Sample Cashier Accounts

Email: ana1@minimarketdonluis.cl | Password: Demo2025! | Business: Minimarket Don Luis
 Email: miguel1@losandessupermarket.cl | Password: Demo2025! | Business: Supermercado Los Andes
 Email: luis1@gmail.com | Password: Demo2025! | Business: Almacén El Rinconcito

Sample Inventory Manager Accounts

Email: jorge1@minimarketdonluis.cl | Password: Demo2025! | Business: Minimarket Don Luis
 Email: claudia1@losandessupermarket.cl | Password: Demo2025! | Business: Supermercado Los Andes
 Email: isabel2@gmail.com | Password: Demo2025! | Business: Almacén El Rinconcito

Subscription Plans

1. Plan Básico - \$9,990 CLP/month

-  2 users included
-  Up to 500 products
-  Basic reports
-  Email support
-  Mobile app
-  15-day free trial

2. Plan Pro - \$19,990 CLP/month

-  5 users included
-  Unlimited products
-  Advanced reports
-  Priority support
-  Mobile app
-  Transbank integration
-  15-day free trial

3. Plan Enterprise - \$49,990 CLP/month

-  Unlimited users
-  Unlimited products
-  Custom reports
-  24/7 support
-  Mobile app
-  Transbank integration
-  Custom API
-  Dedicated account manager
-  30-day free trial

Product Catalog Sample

The master catalog contains 542 Chilean products across categories:

Business Examples

Representative Chilean Businesses

1. **Minimarket Don Luis** (Providencia, Santiago)
 - Plan: PRO
 - RUT: 76.123.456-7
 - Users: 5 (1 admin, 4 staff)
 - Email: contacto@minimarketdonluis.cl

2. **Supermercado Los Andes** (Las Condes, Santiago)

- Plan: ENTERPRISE
- RUT: 76.890.123-4
- Users: 7 (1 admin, 6 staff)
- Email: contacto@losandessupermarket.cl

3. **Almacén El Rinconcito** (Maipú, Santiago)

- Plan: BASIC
 - RUT: 76.234.567-8
 - Users: 3 (1 admin, 2 staff)
 - Email: elrinconcito@gmail.com
-

Next Steps

For Development/Testing

1. **Access the Application**

```
bash
cd /home/ubuntu/github_repos/CRTLPyme
npm run dev
```

Access at: <http://localhost:3000>

2. **Login with Any Account**

- Use credentials from DATABASE_REPORT.txt
- Test different user roles and permissions

3. **Test Features**

- **As Super Admin:** Manage all businesses, view platform metrics
- **As Business Owner:** Manage users, inventory, view sales reports
- **As Cashier:** Process sales, handle transactions
- **As Inventory Manager:** Adjust stock, manage products

For Production Deployment

1. **Security Updates Required**

- ⚠ Change all default passwords
- ⚠ Update environment variables
- ⚠ Configure production database
- ⚠ Enable SSL/TLS
- ⚠ Set up proper authentication

2. **Data Migration**

- Export demo data if needed
- Import real business data
- Configure Transbank production credentials

3. **Monitoring**

- Set up application monitoring
 - Configure error tracking
 - Enable database backups
-

Files Generated

File	Purpose	Location
DATABASE_REPORT.txt	Complete database report with all credentials	/home/ubuntu/github_repos/CRTLPyme/
DATA-BASE_VERIFICATION_SUMMARY.md	This summary document	/home/ubuntu/github_repos/CRTLPyme/
check-database-state.js	Database status check script	/home/ubuntu/github_repos/CRTLPyme/
import-products-only.js	Product import script	/home/ubuntu/github_repos/CRTLPyme/

Scripts for Future Use

Check Database Status

```
cd /home/ubuntu/github_repos/CRTLPyme
node check-database-state.js
```

Import Additional Products

```
cd /home/ubuntu/github_repos/CRTLPyme
node import-products-only.js
```

Generate Fresh Report

```
cd /home/ubuntu/github_repos/CRTLPyme
node generate-database-report.js
```

Run Complete Seed (⚠ Warning: Adds new data)

```
cd /home/ubuntu/github_repos/CRTLPyme
npm run seed
# or
npx tsx prisma/seed-complete.ts
```

Important Notes

Security Warnings

- This is a **DEMO/DEVELOPMENT** environment
- All passwords are simple and publicly documented
- **DO NOT** use these credentials in production
- **ALWAYS** change passwords before production deployment

Data Integrity

- All data is fictional for demonstration purposes
- Chilean business names, addresses, and RUTs are sample data
- Transaction data is randomly generated for the last 3 months
- Product prices are approximate and should be verified

Database Performance

- Database is hosted on Google Cloud SQL
 - Connection: postgresql://postgres:CRTLPyme2025!@136.116.45.158:5432/crtlpyme
 - SSL mode: required
 - Region: us-central1
-

Support & Documentation
